University of Kentucky College of Public Health

Health Information Technology Adoption by Kentucky Health Care Providers

EHR Systems Used by Health Care Providers

Carol L. Ireson RN PhD & Martha Riddell DrPH
8/15/2008

Specific EHR Systems Used by Healthcare Providers

Physicians

Physician users and planners identified more than 70 different EHR systems. The four most popular EHRs were:

- Allscripts
- eClinicalWorks
- Misys
- Team Chart Concept

None of the above was identified by more than 16 physicians.

Hospitals

Hospitals reported 13 different commercially produced systems and two in-house developed systems. The most frequently reported systems were:

- Meditech
- McKesson
- Cerner

Home Health Agencies

A variety of EHR systems were noted by home health agencies. The two most frequently used were:

- Horizon HomeCare (McKesson)
- Ndoc

Mental Health

For mental health respondents with EHRs, two systems were noted most frequently:

- Avatar
- Lavendar & Wyatt

Public Health Departments

Public health departments noted one EHR system in use:

- Custom Data Processing (CDP)

Hospices

The clear majority of hospices used one EHR system:

- Suncoast

Podiatrists

Though a very small sample, the most frequently noted EHR used by podiatrists:

- Medinotes

Optometrists

There were a variety of EHRs used by the optometrists who responded, but there was no clear leader among the systems noted.
